▪ Username

- In the first blank, type your: last name_first initial.
 - For example, Gregory_S.
- If your username is already taken, then just keep adding letters of your first name, one at a time, until it comes up as available.
- However, don't put your whole name there – stop after 2 or 3 letters and then switch to #'s.
- You can only test availability if you also type in a password. Make this something you will remember!

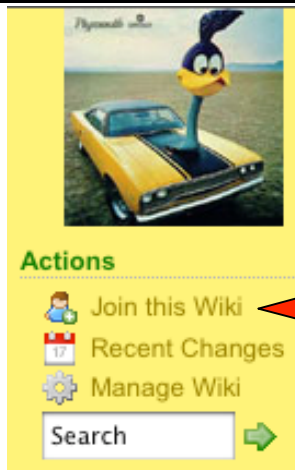

▪ The next page

- If/when this page comes up, Fill in the blanks of #1, #2, and #3. **Ignore #4**, as you are not creating a wikispace, but merely creating an ID.

At any point it asks you about making a “wiki”, say NO for now.
